

Stackable frame BF10-23

Pump specifications:

Type	.BV150 D285
	.430 m ³ /hour (1890 US gpm)
Max. pressure	.24 mwc (79 ft.)
Connections	.DN150 (6")
Solids handling	.80 mm (3.15")
Impeller type	.Semi-open impeller
Priming system	
Electric motor	.30 kW – 4 pole
Voltage	.400/690V 50 Hz
Motor control	.See options page 4
Frame or canopy	.BF10-23 or L10-23
Dry weight	

FEATURES

BV auto prime pump

The BV range of pumps has been designed with a clear focus on reliability and durability. Featuring a 100% mechanical priming system, the BV series pumps quickly prime and re-prime, even from dry conditions. The heavy build style of both pump and frame make the BV range perfect for use in the strenuous drilling market.

World-class performance

The BV range is built to be deployed on the most demanding drilling and bentonite applications. Using high efficiency pumps and state-of-the-art diesel engines, the pumps offer maximum performance at minimal cost, fully in-sync with the company philosophy of "Lowest cost of ownership".

Electric pumps in canopy

- Extremely low noise level
- Maximum safety while running
- Better resistant to vandalism
- More space for your branding
- Optimal weather protection
- Minimal ageing, therefore stable in value

Complete package designed & built by BBA Pumps

- Complete in-house design & production
- Over 70 years of experience in the market
- Complete testing facility in-house
- Contemporary & functional design
- Durable & eco-friendly materials
- · Custom builds available

After sales service & product support

- Single supplier for parts, spares & accessories
- Dedicated customer help-desk (24h service)
- Dedicated service department in-house
- Global parts distribution network
- Optional global on-site servicing available
- Extensive training options available (technical & commercial), on-site or in-house

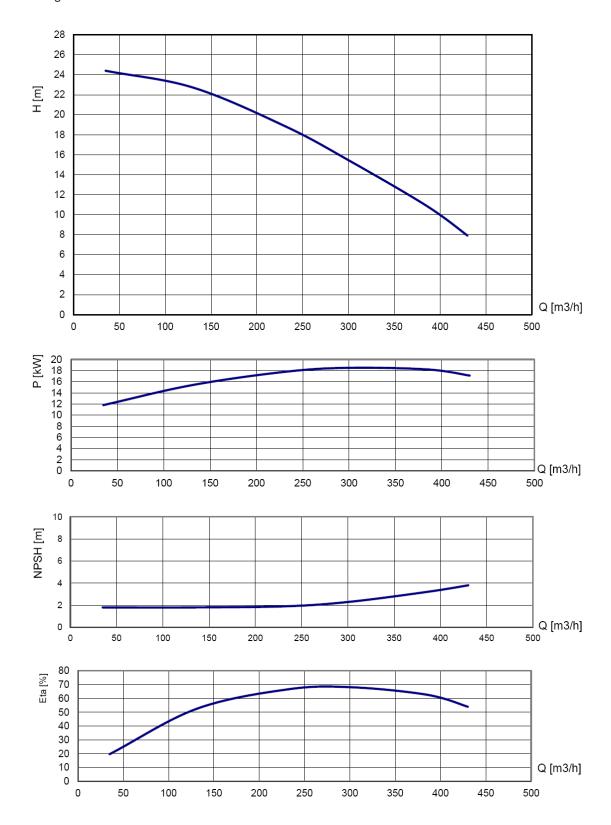

Canopy L10-23

PERFORMANCE CURVES (1475 RPM)

Density: 998.3 kg/m³

STANDARD TECHNICAL SPECIFICATIONS

BBA auto prime pump

Pump type......BV150 D285

Max. flow......430 m³/hour (1890 US gpm)

Impeller Chrome Moly 42CrM04

Wear plateChrome Moly 42CrM04 (adjustable from the outside)

Seal rubbersViton

BBA priming system

Pump type.....BBA MP100 Diaphragm pump

Float box"Easy clean" hot dip galvanized

Non return valveCast iron GG25

Check valve disc.....Buna-N

Electric motor

 Motor type
 HMC 200L-4

 Power
 30 kW (41 Hp)

 Voltage
 400/690 V

 Current In
 53 A

 4-pole
 1480 rpm

 Protection class
 IP55

 Standard
 IEC 60034

BBA stackable frame or canopy

Stackable Frame is stackable Control panel See options page 4

All electrical components safe and dry behind a lockable door.

MOTOR CONTROLS (configurable)

Mobile electric pumps in stackable frames or sound attenuated canopies are equipped with a lockable compartment. This is where the electrical components – such as the motor control – are mounted safely and dry. Configure your pump unit with one of the motor controls listed below.

DOL

With DOL delivery, the electric BBA pump unit is supplied bare without a lockable compartment or motor control. To prevent pump damage, the user must ensure a proper motor start method.

Star-Delta	With <i>SD</i> delivery, the electric BBA pump unit is supplied with a star-delta switch. This is only possible for pumps with a motor power up to 30 kW and sufficient available electrical power due to peak current during start-up.	
	(The vacuum pump always runs together with the main pump)	

99

The SS package, the BBA electric pump unit is fitted with a soft starter. This motor control ensures a smooth start with constant acceleration, reduces starting current and avoids unnecessary mechanical stress on the pump. Another advantage is the linear stop, which prevents pump damage due to water hammer.	
	starter. This motor control ensures a smooth start with constant acceleration, reduces starting current and avoids unnecessary mechanical stress on the pump. Another advantage is the linear

VFD

Variable Frequency With t	he VFD model, the electrical BBA pump unit is equipped
Drive with a water to ene and o	Variable Frequency Drive. This allows you to regulate the flow and pressure by adapting the motor speed. In addition argy savings, variable frequency drives offer many features otimum pump protection. The unit is also equipped with a powerful motor so that the pump can run up to 60 Hz.

Discuss other specific options with your account manager or BBA Pumps distributor.

Optional central flushing
The BV series is optional
available with a central
flushing system to keep your
sludge pump in optimal
condition very easily.

Standard Cillit clear filter
This allows you to easily
protect your vacuum pump. If
the float box is dirty and
therefore does not function
optimally, it is immediately
visible in this filter.

Standard easy inspectionOil glasses, drain valves and fill plugs are all easily accessible.

Standard vacuum pump Double diaphragm pump, water-resistant and oilspillage free. Air capacity of 100 m³/hour.

Standard impeller Corrosion and abrasion resistant Chrome Moly (42CrM04) semi-open impeller.

Standard inspection covers Large ports for easy access to float box, impeller and nonreturn valve.
